SLIDE 1

WHAT IS THE AGENTIC AI SOLUTION YOU PROPOSE TO CREATE?

- Based on the Use Case provided, submit a clear and concise summary of the agentic solution you aim to develop during the Hackathon.
- Scope: Specify the primary problems your solution will address in the use case.
- Technologies: List the primary technologies, frameworks, or tools you intend to use.

SLIDE 2

WHAT IS YOUR PROPOSED PROCESS/METHODOLOGY TO CREATE THE SOLUTION?

- Phases: Outline the major phases or milestones of your project, from inception to completion.
- Team Roles: Identify the roles and responsibilities within your team. Who will do what?
- Risk Mitigation: Describe any anticipated challenges and your plan to overcome them.

SLIDE 3 WHAT VALUE DO YOU ANTICIPATE CREATING FOR ALDO GROUP'S BUSINESS STAKEHOLDERS?

- Business Impact: Enumerate the business metrics (example- increased sales, inventory, cost savings etc) that your solution aims to positively influence.
- User Experience: Explain how the user experience will be affected by your proposal
- Strategic Alignment: Discuss how your solution aligns with ALDO Group’s current business strategy, objectives, or challenges.

PHASE 1 JUDGING CRITERIA

BUSINESS IMPACT & STRENGTH OF THESIS — 30%

- Has the team identified a meaningful problem or opportunity?
- Is there a compelling and well-supported thesis for why the proposed solution creates value?
- Is there a credible path to protecting gross margin and/or improving customer satisfaction?

SCALABILITY AND FEASIBILITY — 25%

- Could this concept realistically operate at retail scale?

AGENTIC INNOVATION — 25%

- Does the solution genuinely take advantage of autonomous reasoning and action?
- Would a traditional rules engine, analytics model or chatbot accomplish essentially the same thing?

PRESENTATION — 20%

- Is the solution clearly explained and convincingly demonstrated?
